

Exp.No:10**VISUALIZE DATA USING ANY PLOTTING FRAMEWORK AIM:**

To write an R code to visualize data using plotting framework such as scatter plot, bar char, histogram and box plot.

PROCEDURE:

1. Install and Load ggplot2: Ensure the ggplot2 package is installed and loaded to use its plotting functions.
2. Scatter Plot: Create a scatter plot of Sepal Length vs. Sepal Width, colored by Species, to visualize the relationship between these two variables across different species in the iris dataset.
3. Bar Chart: Generate a bar chart to show the count of different Species in the iris dataset, using bars filled with a specified color to represent the counts.
4. Histogram: Create a histogram of Sepal Length to visualize the frequency distribution of this variable within the dataset, specifying the bin width and colors for the histogram bars.
5. Box Plot: Plot a box plot of Sepal Length for each Species to compare the distribution and central tendency of Sepal Length across the different species in the dataset.

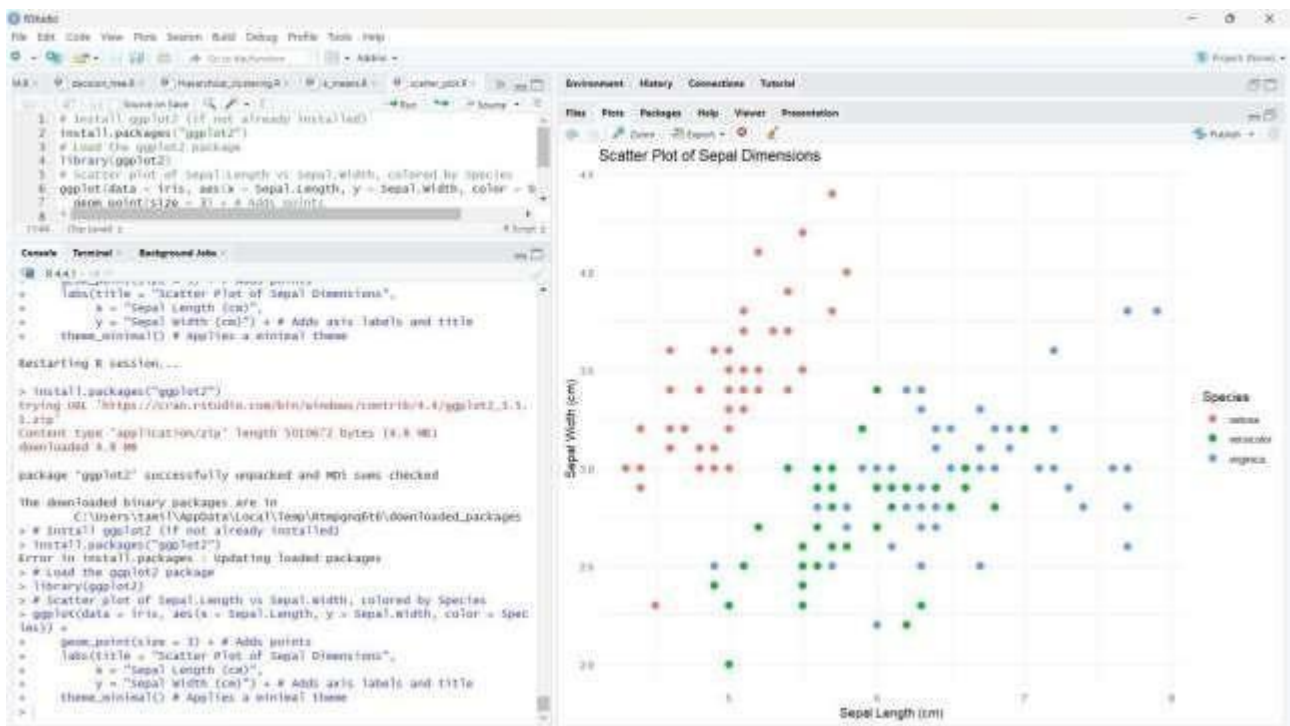

1) SCATTER PLOT

```
# Install ggplot2 (if not already installed) install.packages("ggplot2")
```

```
# Load the ggplot2 package library(ggplot2)
```

```
# Scatter plot of Sepal.Length vs Sepal.Width, colored by Species ggplot(data
= iris, aes(x = Sepal.Length, y = Sepal.Width, color = Species)) +
geom_point(size = 3) + # Adds points labs(title = "Scatter Plot of Sepal
Dimensions", x = "Sepal Length (cm)", y = "Sepal Width (cm)") +
# Adds axis labels and title theme_minimal() # Applies a minimal theme
```

OUTPUT:

2) BAR CHART

Install ggplot2 (if not already installed) `install.packages("ggplot2")`

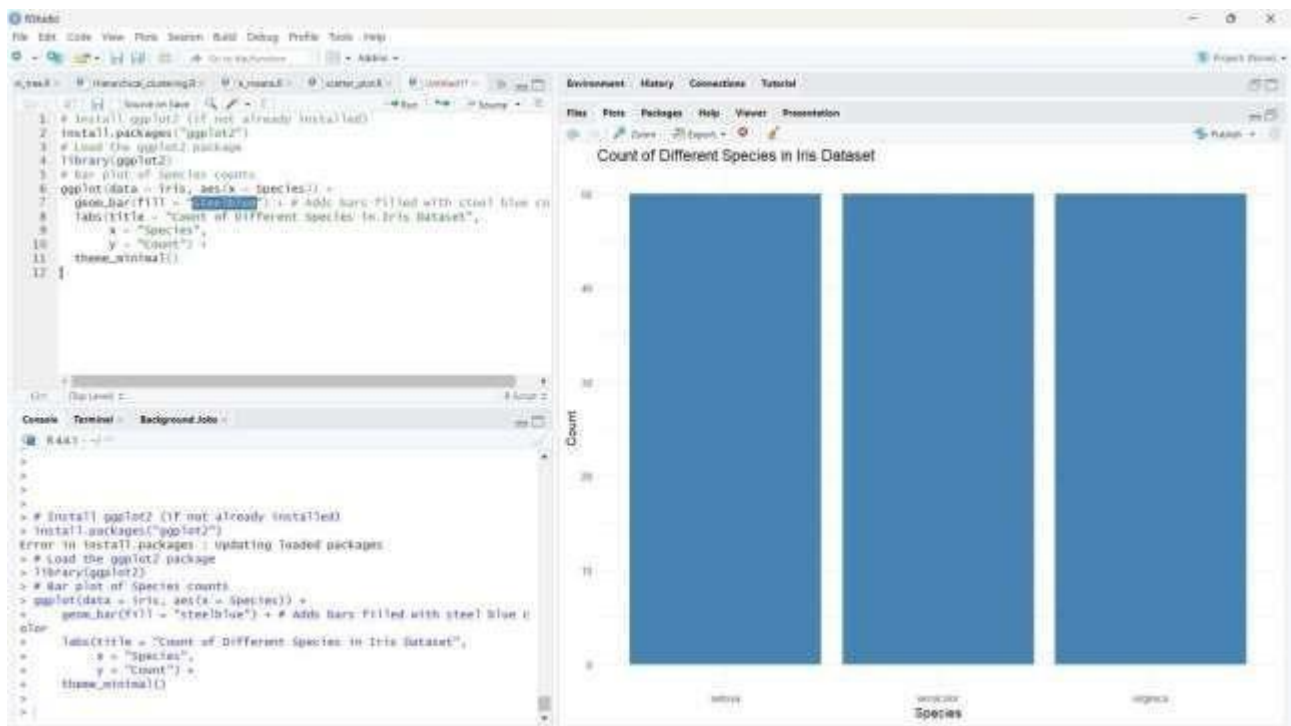

Load the ggplot2 package `library(ggplot2)`

Bar plot of Species counts `ggplot(data`

`= iris, aes(x = Species)) + geom_bar(fill = "steelblue")` + # Adds bars filled with steel blue color

`labs(title = "Count of Different Species in Iris Dataset", x = "Species", y = "Count") + theme_minimal()`

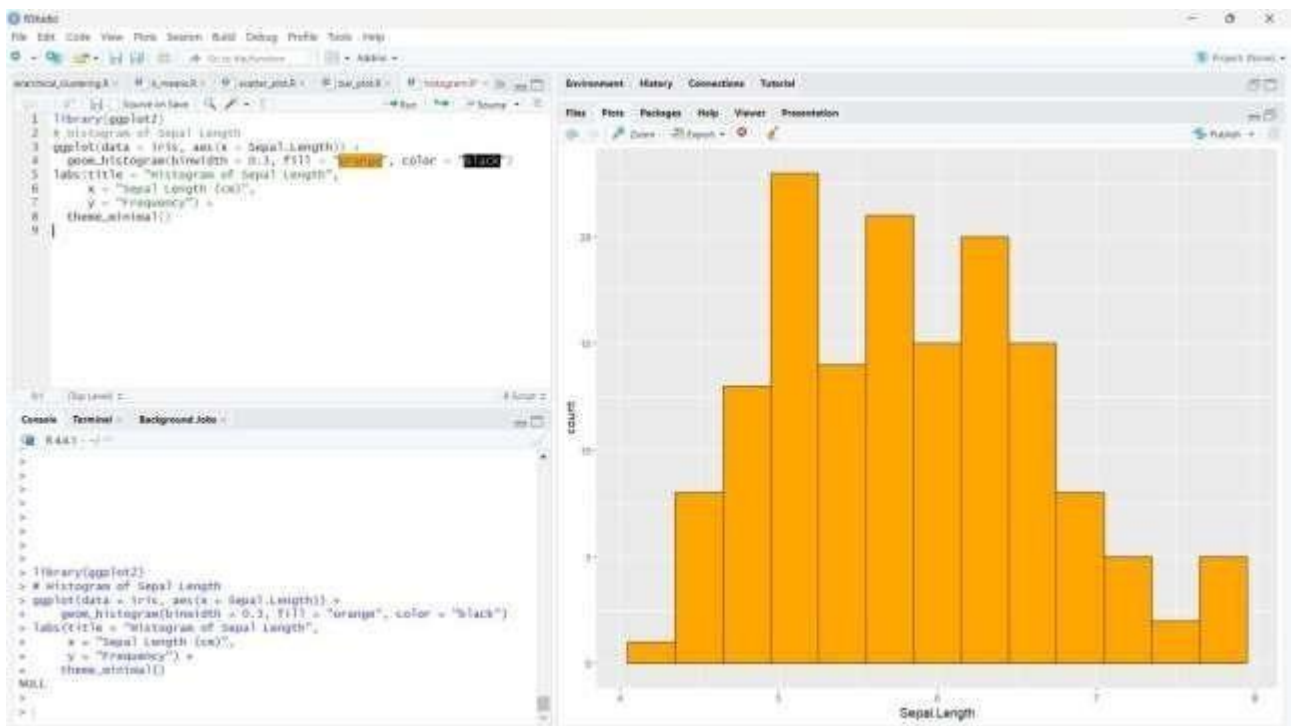

OUTPUT:

3) HISTOGRAM

Histogram of Sepal Length `ggplot(data = iris, aes(x = Sepal.Length)) +
 geom_histogram(binwidth = 0.3, fill = "orange", color = "black") + # Adds histogram bars
 labs(title = "Histogram of Sepal Length", x = "Sepal Length (cm)", y = "Frequency") + theme_minimal()`

OUTPUT:

4) BOX PLOT

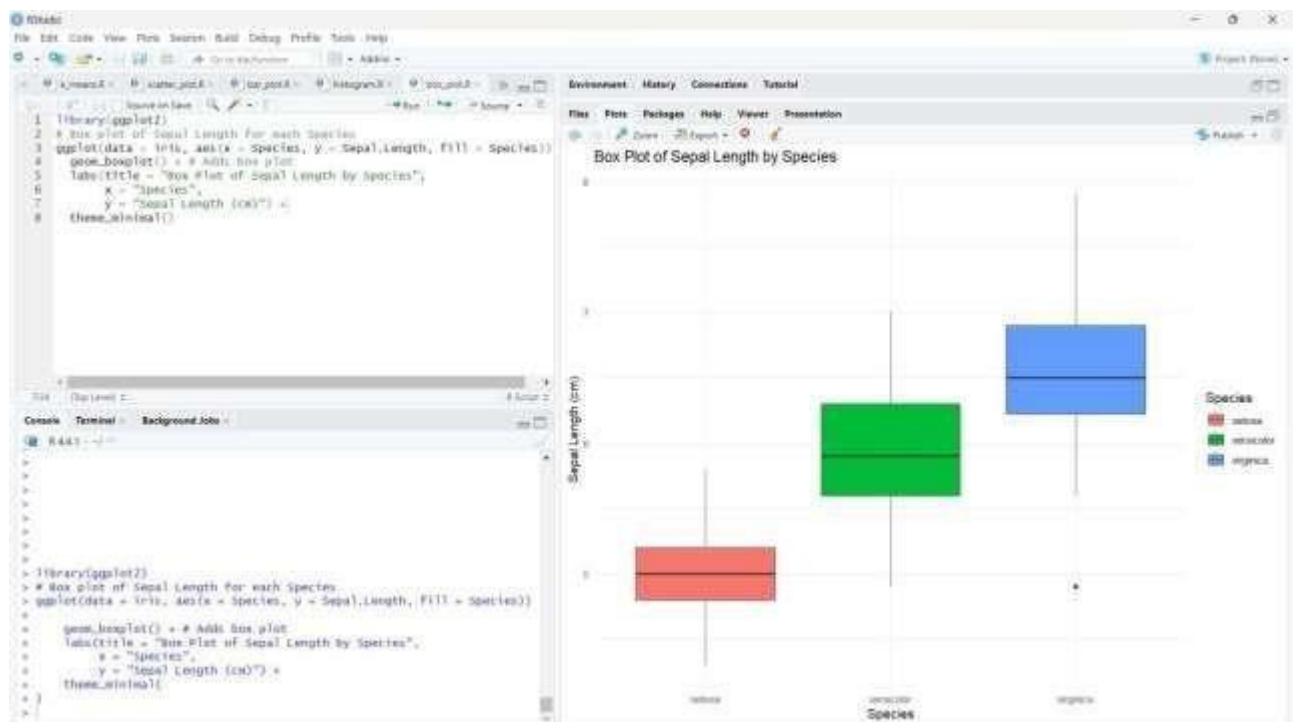

Box plot of Sepal Length for each Species

```
ggplot(data = iris, aes(x = Species, y = Sepal.Length, fill = Species)) + geom_boxplot()
```

+ # Adds box plot labs(title = "Box Plot of Sepal

Length by Species", x = "Species", y = "Sepal Length (cm)") +

theme_minimal() **OUTPUT:**

RESULT:

Thus the R program to visualize data using plotting framework such as scatter plot, bar char, histogram and box plot has been executed and verified successfully.
